

Sürelî Yayınlar 1984

Mining Magazine

APRIL 1984

- International Coal Show 331
Organised by the American Mining Congress, this show taking place in Chicago at the end of April is one of 1984's most important mining events.
- Jharia Coalfield 349
India's main source of coking coal is to undergo major reconstruction, expanding to 57 Mt/y by the year 2000.
- Conveyor Systems 362
Belt conveying is increasingly selected as a practical, economic alternative to both road and rail.
FRONT COVER: (L) The C2 conveyor at Quintette; (Upper R) A 60 in belt conveys copper ore; (Lower R) Continental's test rig for steep conveyors.
- Portal at Point of Ayr 376
Opening a drift through waterlogged ground.
- Subsidence Measurement 379
An example of modern survey techniques.
- Gold Mining in Chile 460
The production of gold from Chile has increased considerably in recent years: the sources are analysed.
- Mineral exploration in Sri Lanka 464
The Geological Survey Department of Sri Lanka plays a key role in mineral exploration. Principal products are graphite, phosphate, ilmenite and gems.
- Gold Analysis 468
Factors to consider when selecting appropriate methods of gold analysis.

JUNE 1984

- Al Masane 538
Progress to date at Saudi Arabia's new copper-zinc-silver-gold property, shown on this month's front cover.
- Mine Ventilation Congress 547
A preview of this conference and exhibition taking place in Harrogate, England this month.
- Energy From Chilled Water 552
Pelton wheels turn potential energy to good use.
- Mine Ventilation Fans 557
An introduction to the theory and practice of fan selection is provided in Part 1. In Part 2 some fans available are described.
- Marketing Copper Concentrates 568
A look at the way Bougainville's concentrates are sold.

MAY 1984

- Shaft Hoists 447
Some of the latest equipment for winding men, materials and minerals in mine shafts is reviewed.

Mining Engineering

APRIL 1984

Engineering and Mining Journal

APRIL 1984

Cominco's new electrolytic zinc plant Cominco has just advanced the state of art with the opening of its new, highly automated zinc electrolytic and melting (E&M) plant in Trail, British Columbia. The installation is not only the world's largest (272,000 mt/yr), but is also claimed to be "the best E & M plant anywhere."	38
In-pit crushing and conveying systems This technology review examines several of the in-pit crushing and conveying systems that mine managers around the world are employing to combat increasing haul lengths and pit depths.	46
Pioneering Pyhasalmi concentrator stays one step ahead of the field Outokumpu Oy's Pyhasalmi copper-zinc-pyrite concentrator in Finland has just undergone process control modernization through installation of the Proscor 20/200 computer system, developed by the company's Engineering Division. The Proscor 20/200 controls three minicomputer measurement and control stations, and includes an automatic monitoring system for all important machines in the plant.	62
New strategies for classification yield big gains at Brazil's Serrana phosphate	70

Five separate circuit modifications over 13 years have produced a net gain of 92% in tonnage treated at Serrana SA de Mineracao's carbonatite ore grinding installation.

MAY 1984

Golden Sunlight sheds warming rays on Placer U.S. The newest addition to Montana's mining industry is Placer U.S.'s \$50 million open-pit gold mine 7 mi northeast of Whitehall. Placer U.S. anticipates 72,000 tr oz/yr from the operation.	34
Cornish tin mining: 1984 Part 1 of this two-part article focuses on the Wheal Jane and Mount Wellington operations of Carnon Consolidated Tin Mines Ltd, and on Geevor Tin Mines' operations on the coast of Land's End peninsula.	40
Sunshine's new Sixteen-To-One silver mine Sunshine Mining Co. has successfully applied a variation of vertical crater retreat (VCR)-mining known as "drop raising" to a small orebody in Nevada's Silver Peak Mountain Range.	46
52nd Prospectors and Developers annual meeting Several new gold developments and diverse	54

exploration equipment highlighted this year's PDA convention, held in Toronto, March 4-7

Australian coal 59
Coal exports during the 1982-83 fiscal year were double the level of a decade earlier, but future expansion will proceed at a slower rate.

Australian oil shale. 61
Four major Queensland projects were the foci of discussions at the recent First Australian Workshop on Oil Shale, held in Lucas Heights: Rundle, Condor, Stuart-Nagoorin, and Julia Creek.

JUNE 1984

1984 Guidebook: The Microcomputer Era 41
This issue spotlights the virtual hoard of techniques and applications that microcomputer technology—still in its infancy—has brought to the mining and processing industries. Six articles address that technology from different perspectives:

Aid to financial planning and investment 41
Micros in exploration and mining 47

Computer networking at Amselco Minerals Inc 50
Using a modem for telecommunications 52
Minerals software for microcomputers 54
APCOM'84 international symposium 55

Automatic control of flotation 62
Important advances in automated processing and control since the early 1970s have made a big impact on the 'bottom line.

Optimizing capacity and economy in crushers 69
Attention to the details of crusher design and the performance of specific crusher components can increase throughput.

Trolley assist and computer dispatching 74
Efforts to hold the line on operating and maintenance costs have produced two effective, new technologies for pit haulage systems.

Cornish tin mining: 1984 83
Part 2 of this two-part article focuses on South Crofty Marine Mining, and Cornish Tin and Engineering.

Direct reduction of ilmenite 85

Mine Ventilation Society of South Africa
